9. Complete the sentences with articles a, an, the or Ø.

Nowadays, hair dye (something that is used to dye hair) is quite common. You might think it's a recent invention, but in fact it's not! During the Stone Age Ø humans used dyes to change the colour of their hair and skin. Ancient Saxons dyed their hair to frighten their enemies. They knew that Ø fear could help them win! In Ø Egypt plants were used to colour hair. These early mixtures could only make hair darker, but then they invented methods to lighten hair. Perhaps the most surprising thing is that nowadays we still use some of the same methods!

Robot teachers

If you think of the jobs robots could never do, you would probably put doctors and teachers at the top of the list. It's easy to imagine robot cleaners and factory workers, but some jobs need human connection and creativity. But are we underestimating what robots can do? In some cases, they already perform better than doctors at diagnosing illness. Also, some patients might feel more comfortable sharing personal information with a machine than a person. Could there be a place for robots in education after all?

British education expert Anthony Seldon thinks so. And he even has a date for the robot takeover of the classroom: 2027. He predicts robots will do the main job of transferring information and teachers will be like assistants. Intelligent robots will read students' faces, movements and maybe even brain signals. Then they will adapt the information to each student. It's not a popular opinion and it is unlikely robots will ever have empathy and the ability to really connect with humans like another human can.

One thing is certain, though. A robot teacher is better than no teacher at all. In some parts of the world, there aren't enough teachers and 9–16 per cent of children under the age of 14 don't go to school. That problem could be partly solved by robots because they can teach anywhere and won't get stressed, or tired, or move somewhere for an easier, higher-paid job.

Those negative aspects of teaching are something everyone agrees on. Teachers all over the world are leaving because it is a difficult job and they feel overworked. Perhaps the question is not 'Will robots replace teachers?' but 'How can robots help teachers?' Office workers can use software to do things like organise and answer emails, arrange meetings and update calendars. Teachers waste a lot of time doing non-teaching work, including more than 11 hours a week marking homework. If robots could cut the time teachers spend marking homework and writing reports, teachers would have more time and energy for the parts of the job humans do best.

Hi Laura!

I haven't seen you in ages, what's new with you?

I'm finally coming to Ljubljana so I wanted to ask your advice on what I should do while I'm there. What shouldn't I miss? I'm coming there with my parents and my baby sister who is 3 years old and we want to do things we can enjoy as a family. ✓

We've already got a hotel booked in the city centre and we arrive on 12th January for a week.

I hope you're around so we can meet up! ❤️✓

See you soon,

Jerry

Another thing, you MUST try our food - especially Žlikroci, Polica
and our delicious Beef soup. You should have no problem finding these
3 dishes in Ljubljana, though if you want good Žlikroci, you should go to
Breginjska Ahiya. There, you can also go visit the mercury mines. They are
very interesting ~~as they are extremely~~ as well.

Anyways, gotta go do math homework now - the teacher always gives us
so much!

~~Can't wait for your visit.~~
